Industry Structure & Development

Despite new risks, the global economic recovery is gaining strength and the IMF has projected a 4.5% world growth in 2011 and 2012. While growth in emerging economies remain strong, that in the US and European region is slowly gaining momentum. Some of economies of the developed nations are still a concern with the Euro Zone being the most vulnerable as rating agencies continue to downgrade the sovereign rating of many of economies in this region. The natural disaster in Japan, sharp increase in oil prices consequent to the turmoil in the Middle East and North Africa is fuelling uncertainty to the pace of the global recovery. Globally, elevated goods and commodity prices accompanied by the spike in oil prices have engendered inflation concerns.

The Indian economy registered improved growth and was amongst the better performers amid emerging market economies, Central Statistical Organizations' recent estimated Indian GDP growth are of 8.6% for 2010-11 is consistent with the RBI's projections for the same period. While the area sown under the Rabi Crop is higher than last year which augurs well for agricultural production, the index of industrial production continues to be volatile. The Other indicators such as latest Purchasing Manager's index, direct and indirect tax collections, merchandise exports and bank credit suggest that the growth momentum persists. However continuing uncertainty about energy and commodity prices may vitiate the investment climate, posing a threat to the current growth trajectory. Inflation remains a challenge for the Indian Economy and the key risks are tighter monetary conditions and raising prices eating into the consumers' disposable income.

Opportunities & Threats

The present global economic scenario throws up opportunities for fundamentally strong companies such as your Company. Your Company has positively faced the ever changing period in the financing and

investment market quite effectively. The fiscal policies brought by Government in the recent times have been encouraging. The economic plan aims to put the economy towards a path of sustainable growth and progress. Your Company pays special attention to its valuable human resources. Further in view the support offered by Government and financial institutions, your Company is keen to achieve an established name and goodwill in the market.

On the other hand, higher cost of funds for borrowers is beginning to have an effect, although it is still too early to spot definitive trends given the presumed lags in monetary policy transmission, industrial growth has slowed, not just because of statistical base effects, but even in seasonally adjusted month on month terms. There are reports of increasing automobile and housing investment.

In term of investment activities, drying liquidity, lack of retail participation in the Capital Market, slowdown in growth of bigger companies due to lack of demand by retail chain and also increase in interest rate and thus diversification of interest of common man towards depositing money with bank rather than investing in Capital Market are also a cause of concerns for the Company.

Performance Highlights and Future Plans

With the economic revival gathering momentum, a clutch of growth trajectory initiatives enabled your Company to deliver positive growth and further consolidate its presence in the core business. FY 2011 has been both challenging and momentous for your Company. The resilience and inherent strength of your Company's updated and timely taken decisions have enabled your Company to deliver better performance with improvements across key parameters in FY2011.

Dynamic Portfolio Management & Services Limited (DPMS) is a NBFC Company and its main source of Income is NBFC activities i.e. Interest on Loan. Other source of Income is from the investment in Stock Market. DPMS is in the area of project finance with Corporate Bodies and HNIs. Your Company has, in order to reduce credit risk, improved security coverage and higher marginal rate of return and increased its exposure in the area of Promoters' Funding, where it faced competition from NBFCs only.

The entire financial year was challenging for the Company with vast global scenario, economic slowdown and increasing inflation. This has forced Company to be strict with its policies while allocating Loan to new clients and due to slow down and increased rate of interest, even demand has been decreased and thus restricted the limited opportunities for your Company. The Company has tried its best to maintain profit and to run its business as NBFC.

On Investment front, melt down in US and Europe Capital Market has also triggered low volume and lack of investment in Indian Capital Market. This has laid to the ignorance by small investors and thus hearted the Investment business of the Company. With a fear to further deepen of the situation, the Company has decided to sell off its part of Investments and this has incurred loss in investment activities.

In FY13, the Company is hopeful of doing better in its core business in Financing and Investment activities as well as in the diversified business like Infrastructure business as well as Software business.

Business Segment

Your Company basically operates in two types of activities i.e. Investment activities, activities of investment in the Capital Market as well as Off Market deal in both listed and unlisted securities. The natural disaster in Japan, sharp increase in oil prices consequent to the turmoil in the Middle East and North America is fuelling uncertainty to the pace of global recovery.

Globally, elevated food and commodity prices accompanied by the spike in oil prices have endangered inflation concerns.

The Indian Economy registered improved growth and was amongst the better performers aid emerging market economies. Central statistical Organizations' recent estimated Indian GDP growth rate of 8.6% for 2010-11 is consistent with the RBI's projections for the same period. While the area sown under the Rabi Crop is higher than last year which augurs well for agricultural production, the index of industrial productions continues to be volatile. The other indicators such as latest Purchasing Managers' Index, direct and indirect tax collections, merchandise exports and bank credit suggest that growth momentum persists. However, continuing uncertainty about energy and commodity prices may vitiate the investment climate, posing a threat to the current growth trajectory.
